Autobody Technology

Body Service Educational Program (BSEP)

Receive training and
earn a college degree

CSI Autobody Tech is....

A one or two-year, cooperative auto collision repair training program designed to develop the technical and professional competence required of entry-level auto body technicians employed in dealerships and independent collision repair shops.

DEGREES AVAILABLE

One year: Technical Certificate (General Requirements)

Two year: Associate of Applied Science (BSEP)

Why Enroll?

MOST COST-EFFECTIVE way to obtain an auto body associate degree.

PAID WORK EXPERIENCE at a dealership or participating independent collision repair facility.

APPROVED TRAINING materials using the most advanced auto collision repair technology available.

CAREER ADVANCEMENT opportunities with your participating dealership or independent collision repair facility.

What Will You Learn?

Technical courses are created by CSI and its affiliates and include:

Precision analysis and measurement of collision damaged vehicles

Repair and replacement of damaged body and structural components using the latest composite materials available

Refinishing and color matching of vehicles using the most current paint and application technology.

As a CSI autobody technician student, your training will also include study in these important related areas:

Reading, communication, and reasoning skills

Interpersonal skills

Business-related subjects

CSI Requirements

- ☑ All participants are encouraged to be employed by a participating dealership or independent collision repair facility. You have a job before, during and after college.
- ☑ Students are responsible for the cost of all tuition, books, and related materials as well as the required tools. *(Tuition costs may be offset through various forms of financial aid.)*

Employment

Auto body repairer is among the occupations projected to have the most job openings 2000-2010.*

Employers concerned about service, efficiency and profitability compete to recruit skilled auto body technicians—you can become one of the highly-qualified employees they need.

CSI autobody technician training, along with additional experience and guidance, help develop future:

Body Shop Managers

Estimators (for collision repair shops and insurance companies)

Body Shop Owners
